

GARY STEWART AUDIO The Finest in NightClub Systems

GSA would like to take this opportunity to formally introduce ourselves and tell you a little about who we are and what we can do to help make your venue a benchmark for nightclubs around the world.

As a company that exclusively specializes in near-field, high-impact, nightclub sound systems, GSA over the years has had the opportunity to work with a diverse group of clients designing and building sound systems against which all other sound systems are measured. Our list of clients include Ministry of Sound in the UK, Sound Factory, Discotheque, Vinyl and System in NYC, Fitzcarraldo in Florence and our latest projects which are as unique and diverse as our former ones, Love in NYC and Sound Planet in the Ukraine.

While our approach to sound system design is rooted in solid, proven technologies, we are also aware that every club and every space is unique; therefore we are constantly vigilant for improvements and advances. The right mix of analog and digital components is the secret behind our design and success of our projects. With that in mind, all our speaker enclosures and custom transducers are manufactured to meet our exact specifications; while all of our custom electronic crossovers and other components are designed and built to make speakers like the GSA Bass horn deliver the clearest and cleanest monster sound they are built to produce.

Almost 45 years of combined nightclub sound design experience and our track record makes us confident that GSA can design a sound system that will make your club not only the nightclub with the best sound on this planet, but the nightclub where club-goers and DJs from all over the world come to be "enlightened."

We hope to hear from you soon so we can meet and discuss in detail what your vision and expectations are for the sound system in your venue.

Sincerely,

A handwritten signature in black ink that reads 'Gary Stewart'. The signature is fluid and cursive, with a long horizontal line extending from the end of the name.

Gary Stewart
